

## Stable Cell Line Development Service

Our proprietary ExoIN technology is a powerful and reliable platform for generating customized assay cell lines with stable and homogeneous target expression. Using this technology, we are able to generate your desired mammalian cell line according to your specific project requirements within weeks instead of months.

- ✓ Highly customized and flexible project design
- ✓ One-stop-shop: from cloning to shipment of customized ready-to-use stable assay cell line
- ✓ Dedicated project management ensures close communication between experts and clients
- ✓ High quality and efficiency of services

## Process of Stable Cell Line Development

# Main Advantages of trenzyme's ExoIN Technology

- ✓ Fast feasibility answer - cell growth under selection conditions correlates with target expression
- ✓ ExoIN technology is applicable to any cell line and all target classes
- ✓ Three different selection markers allowing simultaneous selection of up to three targets
- ✓ Target remains unmodified and functional due to perfect cotranslational cleavage
- ✓ Tunable target expression by simply modifying the selection pressure
- ✓ Generation of ready-to-use stable assay cell lines within weeks – no single cell cloning needed
- ✓ Reliable and powerful platform – more than 1,000 generated cell lines for international clients

“We were astonished by trenzyme’s recently delivered custom ExoIN cell lines. Even “difficult-to-express” constructs show stable and robust expression. I highly recommend trenzyme’s cell line development service.”

**PD Dr. Dieter Wicher**

Max Planck Institute for Chemical Ecology, Jena, Germany

## Why choose trenzyme - your benefits from working with us:

- Our modular project designs are custom-tailored to your specific project requirements
- Our scientific experts will complete your project successfully and efficiently
- Your project manager keeps you constantly informed on progress throughout the project
- We are a reliable and long-standing partner of many international pharmaceutical companies
- All services run under ISO 9001 quality management standards

## Discover all the services we offer:

- ▶ Cell Lines with Inducible Expression
- ▶ GMP-compliant Production Cell Lines
- ▶ Custom Cell Line Expansion
- ▶ Master Cell Bank Generation
- ▶ Custom Protein Production & Purification
- ▶ Guaranteed Protein Expression Packages
